Members	545	524	492	490	532
New members this year			102	104	104

Summary

The number of members have yet again increased from 524 to 545. This is partly due to the breeders which have the opportunity to enter their puppy buyers as members of the club to a reduced price for the first year.

The breeding in 2017 shows a decrease in numbers in relation to the year before. We are pleased to see that the tendency from 2016 with a heavy increase in both the use of insemination and cesareans has not continued in 2017.

In 2017 the board had a seminar working with the club's vision for the future. An outcome of this seminar was the launching of a scheme, where all the committees have been asked to work out guidelines for their work and cooperation with the board. All the committees have shown a positive attitude to this task and although the work is still ongoing it points in a direction of a renewed way of releasing initiative concerning activities and delegating responsibility in the running of the club and its different activities.

In respect of dogs participating in dog shows, Icelandic Sheepdogs have been represented in 14 Kennel Club shows (2 of which took place in the Faroe Islands) and 7 Club Shows (3 of which were in cooperation with another special club).

A total of 477 dogs were signed up in the above mentioned shows.

A total of 35 dogs were mental tested and we have now collected data from 624 different dogs. 33 of the participating dogs completed the test. 1 dog was stopped before the shooting according to the wish of the handler, 1 dog was stopped according to fright concerning the shooting. According to the mentality committee the tested dogs in general show an average for the breed, but the results also point to the fact that work can be done concerning increasing the curiosity of our dogs and decreasing their fear.

In respect of herding a total of 30 dogs were tested on two different occasions.

In total we have tested 188 dogs since 2008, which distributed shows the following results (in brackets the numbers concerning 2017):

78 (7) shows no instinct, 44 (8) shows heading instinct, 25 (5) shows hunt away instinct, 9 (6) shows instinct as a farm dog, 28 (4) shows both heading and hunt away instincts, 4 (0) was too stressed to show anything.

Louise Roer, Chairman

Else Westermann and Anne Marie Toft Hansen, Breeding Committee

Statistics overview and comments, registrations
