

Icelandic Sheepdog Association of America, USA

Annual report for the year 2023

Statistics overview and comments, registrations

Board members

President: Jenifer Brimmer

Vice President: Blake Williams

Treasurer: Judi Vittetoe

Recording Secretary: Heather Kovis

Membership Secretary: Sue Peterson

AKC Delegate: Pat Putnam

Director 1: Marlys Nessel

Director 2: Brittany Slane

ISAA BOD email: isaabod@gmail.com

Committee Chairpersons

Titles and Events: Piper O'Donnell:

Judges' Education: Pat Putman

Calendar: Kristine Hynes:

Health and Genetics: Marlys Nessel,

Breeding Committee / Pedigree Database Manager: Elaine Mozur:

Versatility Awards Committee : Veronica Dowling:

ROM Committee: Blake Williams

History Committee: Spike Williamson:

Constitution and By-Laws: Spike Williamson

ISAA Website: Kristine Hynes

Social Media: Gabi Vannini

AKC Gazette Columnist: Karen Tucker

Newsletter: Colleen Schmidt

ISAA Annual Report: Elaine Mozur

2024 National Specialty:

Nominating Committee:

Statistics overview and comments, registrations

Board Meetings: In 2023, Quarterly Board meeting were held with special meetings held in between to discuss specific issues. Meeting minutes are being published in the quarterly newsletter.

Annual Meeting: Was held on March 31, 2023, in conjunction with the National Specialty in Wilmington, Ohio.

Calendar Committee: Kristine Hynes

AKC Gazette Breed Column: Karen Tucker has filled the position in 2023.

Newsletter: The club distributes a Quarterly Newsletter in 2019 Colleen Schmidt became the editor. She has begun a column featuring the activities of ISAA Juniors called "Taking The Lead" in an effort to help encourage and mentor the next generation of Icelandic Sheepdog owner. In 2022, Colleen began publishing Board meeting minutes in the Quarterly Newsletter

National Specialty: The 2023 National Specialty was held in_Wilmington, Ohio. Susan Fisher was the chairperson.

Icelandic Sheepdog International Cooperative (ISIC): 2023 Breeders Meeting was attended via Zoom by Elaine Mozur.

Website: In 2022, Kristine Hynes began the redesign of the icelanddogs.com and continues to populate the website.

Database and Pedigrees: In September 2023, Elaine Mozur assumed the responsibility and began updating and correcting errors in the ISAA Database, ISIC database and the Dogs Global.

Club Insurance: Policy continues to be held by Equisure for both the board and the events

Membership Discussion Groups (ISAA CHAT) Facebook: Gabi Vannini

Nominations and Elections:

Purina Parent Club Partnership Program:

AKC Breed Standard Revision: In 2022, members voted to accept the proposed revision of the AKC standard. Procedural errors require the accepted revision to be sent back to the AKC to start the process again.

Born in the USA

2023 Breeding Committee Summary

In 2023, the Breeding Committee increased their efforts to get essential information related to the breeding of Icelandic Sheepdogs to all of the Breeders in the USA. The breeding committee produced a pedigree comparison of all litters produced in the USA for 2022, this is to demonstrate how frequently certain ancestors may be appearing in our gene pool, where we might be losing genetics or where we can begin to create or preserve diversity. This comparison was added to the ISAA website,

The studs, dams and litters in the 2022 litter comparison have been color-coded to correspond to Dogs Global mean kinship calculations, those mean kinship calculations have been also been added to the annual report. In the 2023 Annual Report, Stud and Dam counts are arranged by number of grandchildren instead of offspring to document the impact to the gene pool they are making rather than just how many puppies they've produced.

The U.S. Icelandic Sheepdog Community has stepped up again in 2023 to support transparency by reporting health conditions not recorded by OFA. The Breeding committee has been developing a database to communicate health and breeding concerns for the Breeding Community in the USA, breeder contributions to this data concerning health and population growth is essential for the future of the breed.

In 2023 the Breeding Committee

- The Breeding Committee populates 3 databases in addition to an annual litter spreadsheet.
 - ISAA Breedmate Pedigree Database
 - ISIC Pedigree Database
 - Dogs Global Pedigree Database
 - Annual Litter Spreadsheet records:
 - All known US born puppies – reported and found data.
 - Import data i.e country of origin, pedigree data
 - COI
 - Mean Kinship
 - Pedigree database corrections made
 - Health issues reported
 - Additions to the pedigree databases from past litters previously unknown.
 - Sire and Dam offspring counts
- Tracked and recorded 34 U.S. Litters in the Annual Litter Spreadsheet.
 - Calculated COI% at 5 generations
 - Calculated COI% at all generations.
 - Calculated mean kinship% of all litters
 - Recorded mean kinship group of sire and dam.
- Of the 34 litters tracked, 88% were reported to the ISAA by either the Breeder or Co-Breeder
 - To aid in ensuring data integrity – all litters reported by breeders were sent back completed pedigrees from ISAA Breedmate database to review.
- Entered 141 puppies into all 3 pedigree databases and the annual litter spreadsheet.
- Recorded 8 Imports and entered them into the ISAA Breedmate Pedigree Database (one recorded dog was a 2021 import).
 - Some of the imported dogs the Breeding Committee had to go back to the 1990's to add their ancestors pedigree information into the ISAA Breedmate pedigree database. This is an indicator that the pedigree is somewhat unique to the USA's gene pool, even if it not unique in their country of origin.

Statistics overview and comments, registrations

- There were 35 pups captured from past US litters that were added to all three databases.
- Health issues from 10 dogs were submitted by owners/ Breeders for inclusion in the ISAA Annual Report.
- There were 22 errors found and corrected in the pedigree databases of US dogs. Foreign dog errors and duplicates found were reported to the ISIC Breeding Committee Chairperson.
- Completed the 2022 Annual Report.
 - Compiled Health Data for the Annual Report.
 - Compiled Titles and Events Data for the Annual Report.
 - Compiled Breeding Data for the Annual Report.
- Submitted the 2022 Annual Report to the ISIC committee.
- Submitted the 2022 Health Testing to the ISIC Breeding Committee.
- Assisted Dr. Oliehoek with confirming Canadian registration numbers in Dogs Global.
- Submitted all health testing to Dr. Oliehoek for future inclusion to Dogs Global.
- Completed the 2022 Pedigree Comparison Spreadsheet, and had it loaded onto the ISAA Website.
- Attended electronically the 2023 ISIC Breeding Committee meeting and submitted notes to the ISAA Board and Health and Genetics group.
- Have put a hold on entering Health testing data to ISIC and Dogs Global Databases while upgrades are in process.

Stud dogs

2023 Stud dog counts

In 2023 there were 31 recorded studs used to sire 34 recorded litters and 11 new studs added to the Stud book. Color coded studs are derived from Dogs Global based on breed wide calculations. No color is to be considered good or bad, these designate how often these pedigrees are present in the global population. Stud counts are organized according to the amount of Grand Children a stud has since in the USA spay / neutering is quite common – the impact our dogs have on our population is better seen with their grand offspring rather than their offspring.

 = Pedigrees that are most common in the global population

 = Pedigrees that are increasing in numbers in the global population

 = Pedigrees which are neutral these neither increase nor decrease diversity

 = Pedigrees which increase diversity in the global population

 = Pedigrees where the dog s retired or is deceased but still has active offspring / grand offspring in the gene pool

2023 Dam puppy counts

Statistics overview and comments, registrations

= Pedigrees that are most common in the global population

 = Pedigrees that are increasing in numbers in the global population

 = Pedigrees which are neutral these neither increase nor decrease diversity

 = Pedigrees which increase diversity in the global population

 = Pedigrees where the dog s retired or is deceased but still has active offspring / grand offspring in the gene pool

In 2023, 32 Dam's gave birth to 34 litters. There were 18 new bitches added to AKC Studbook. Color coded dams are derived from Dogs Global based on breed wide calculations. No color is to be considered good or bad, these designate how often these pedigrees are present in the global population. .Dam counts are organized according to the amount of Grand Children a bitch has since in the USA spay / neutering is quite common – the impact our bitches have on our population is better seen with their grand offspring rather than their offspring.

| Registration # | Birthdate | Dams | Litters | Offspring | Grand offspring |

Health Summary

The Icelandic Sheepdog Association of America (ISAA) joins the country of origin, other recognized breed clubs and the Icelandic Sheepdog International Cooperation (ISIC) to work together to protect and maintain breed health. This

Statistics overview and comments, registrations

includes encouraging health testing and sharing results from the Orthopedic Foundation for Animals (OFA) registry as well as participating in studies and research. Additionally, contributing to the Canine Health Information Center (CHIC) DNA Repository, co-sponsored by the OFA and the AKC/Canine Health Foundation (CHF) is encouraged as they collect and store canine DNA samples along with corresponding genealogic and phenotypic information to facilitate future research and testing aimed at reducing the incidence of inherited disease in dogs.

Icelandic Sheepdog owners are encouraged to record all Health testing results, including failed testing. The best way to keep a breed healthy is knowing how and where to compensate for a potential health issue. Health testing results are a tool to help Breeders make the best choices. For Recorded Health testing see Appendix B

- Please Note:** OFA records hip scores for not only the USA but also Iceland and Canada, this creates an extremely useful tool for breeders in these countries as it links related pedigrees and their health test results of the 3 countries. OFA's report does not sort out health testing by country when reporting statistics, we have reported all health testing OFA has recorded for 2021, therefore the statistics below do include hip results from not only the Icelandic Sheepdogs in the USA but also Canada and Iceland.

Hip Dysplasia (HD)

Two methods of hip testing are done in the United States: PennHip and OFA.

PennHip: This method recommends breeding only dogs with an above average score, so starting at the 60th percentile is recommended. The scores that correlate with the different percentiles may change as genetic progress is made from one generation to the next, moving the breed average towards tighter hips.

PennHip Distraction Index Laxity Profile for the Icelandic Sheepdog

| Pennhip | 2023 | 2021 | 2020 | 2016 | 2015 | 2013 | 2012 | 2011 | 2009 | 2007 |

HD (Hip Dysplasia) Comparison of Various Testing Measures: (Provided by OFA)

| OFA | FCI (European) | BVA (UK/Australia) | SV (Germany) |
|-------------------|----------------|--------------------|-----------------|
| Excellent | A-1 | 0-4 (no > 3/hip) | Normal |
| Good | A-2 | 5-10 (no > 6/hip) | Normal |
| Fair | B-1 | 11-18 | Normal |
| Borderline | B-2 | 19-25 | Fast Normal |
| Mild | C | 26-35 | Noch Zugelassen |
| Moderate | D | 36-50 | Mittlere |
| Severe | E | 51-106 | Schwere |

Eye examinations and Ocular Disorders 1993 – 2023

According to OFA, the purpose of the OFA Companion Animal Eye Registry (CAER) is to provide breeders with information regarding canine eye diseases so that they may make informed breeding decisions in an effort to produce healthier dogs. CAER certifications are performed by board certified (ACVO) veterinary ophthalmologists. Regardless of whether owners submit their CAER exam forms to the OFA for "certification," all CAER exam data is collected for aggregate statistical purposes to provide information on trends in eye disease and breed susceptibility.

Genetic diseases are those that are passed on from parent to offspring through genes that carry the codes for each specific trait. Many of the diseases and disorders that affect the eyes have genetic factors. How does OFA identify an inherited eye disease? Until the genetic basis of an ocular disorder is defined in a peer-reviewed published report, they rely on what statistical information is available from registry organizations, informed opinions and consensus from ACVO diplomates. They must satisfy themselves with terms like "presumed inherited" and "suspected to be inherited." There are eye diseases in the dog for which there is evidence of a genetic or heritable cause.

Statistics overview and comments, registrations

The American College of Veterinary Ophthalmologists has listed ten of these diseases as automatic “fails” (this means the affected dog is ineligible to receive an eye certification) because of the significance of the condition to vision and/or the very strong evidence of heritability. These are conditions which frequently result in blindness and for which there is definite evidence of heritability in one or more breeds.

Note: The prudent approach to these disorders is to assume they are hereditary except in cases specifically known to be associated with trauma, other causes of ocular inflammation, specific metabolic diseases or nutritional deficiencies

1. Keratoconjunctivitis sicca (KCS) – Breeding is not recommended for any animal demonstrating keratitis consistent with KCS. See above note.
2. Cataract – Breeding is not recommended for any animal demonstrating partial or complete opacity of the lens or its capsule unless the examiner has also checked the space for “significance of above cataract unknown” or unless specified otherwise for the particular breed. See above note.
3. Lens luxation or subluxation – See above note.
4. Glaucoma – See above note.
5. Persistent hyperplastic primary vitreous (PHPV)
6. Retinal detachment – See above note.
7. Retinal dysplasia – geographic or detached forms – See above note.
8. Optic nerve coloboma
9. Optic nerve hypoplasia 10. Progressive Retinal Atrophy (PRA) – Breeding is not advised for any animal demonstrating bilaterally symmetric retinal degeneration (considered to be PRA unless proven otherwise)

Statistics overview and comments, registrations

Owner Reported Health Conditions

This section is reserved for health issues that are not or not able to be recorded in conventional databases (OFA). These owners and breeders want there to be a public record of these health issues to trend and inform the Icelandic Sheepdog breeding community. Please extend your appreciation to these breeders for their transparency.

| Condition | Name | Comments |
|-----------------------------------|------------------------------------|---|
| Cleft Lip – no palate involvement | Red Cedar Little Bug on the Wall | |
| Cleft palate | Caradoc's Bottom's Up | |
| Cleft palate | Thrymheim puppy 2023 | |
| Luxating Patella | Sivok's Harbinger of the Wolf | No medical intervention is needed at this time |
| Cleft palate | Saman puppy 2023 | |
| OFA Moderate Hip Dysplasia | Fox Meadow Stormveidimadur Isdreka | Pup had total hip replacement at 9 months, owner had Preliminary OFA Evaluation performed prior to hip replacement so that a hip score and evaluation could be documented. OFA does not publish Prelim evaluations. |
| Bi-lateral Deafness | Apricity pup 2023 | White pattern deafness, pup is doing well learning commands. |
| Moderate Hip Dysplasia | Fox Meadow Stormveidimadur Isdreka | Total Hip Replacement @ 10 months old. Prelim OFA performed prior to hip replacement, hip was evaluated as moderate HD. Insurance covered replacement. |
| Cleft palate | Greenbrier puppy 2023 | |
| Idiopathic Epilepsy | Crown Elska Amaliadottir | Being treated with phenobarbital and extended release Keppra. |

2023 National Icelandic Sheepdog Rescue Alliance Report

The National Icelandic Sheepdog Rescue Alliance, our mission transcends mere animal care; it's a commitment to preserving a legacy. As a devoted, volunteer-driven 501(c)3 non-profit organization, founded in 2009, we dedicate ourselves to the safeguarding and nurturing of the Icelandic Sheepdog, an ancient and rare jewel of the canine world.

We are steadfast in our resolve to rescue, rehabilitate, and rehome Icelandic Sheepdogs, ensuring that every 'Icie' in distress finds a loving, permanent sanctuary. Our approach is comprehensive and compassionate, encompassing not only rescue and rehoming but also providing critical transport and foster care services.

Understanding the pivotal role of education, we serve as an informative beacon for Icie owners, breeders, and the broader public, offering resources and guidance to deepen their understanding and appreciation of this unique breed. We believe in nurturing the bond between Icies and their families, offering support to current owners with the aim of maintaining these cherished companions in their loving homes whenever feasible.

Our network thrives on the spirit of volunteerism. We actively seek, celebrate, and support volunteers whose dedication breathes life into our mission. As a central communication hub, we connect owners, breeders, and enthusiasts, fostering a community united in its passion for Icelandic Sheepdogs.

In celebrating this special breed, our vision is not just to address the immediate needs of these dogs but to ensure their enduring welfare and recognition. We envision a future where the Icelandic Sheepdog is not only preserved but thrives, supported by a knowledgeable, engaged community that cherishes every wagging tail and heartfelt bark. This is our pledge and our promise, as guardians of the Icelandic Sheepdog legacy.

Statistics overview and comments, health

Appendix A

2023 Litters

- = Pedigrees that are most common in the global population
- = Pedigrees that are increasing in numbers in the global population
- = Pedigrees which are neutral these neither increase nor decrease diversity
- = Pedigrees which increase diversity in the global population

Color coding is derived from Dogs Global based on breed wide mean kinship calculations. No color is to be considered good or bad, these designate how often these pedigrees are present in the global population.

| Whelped | Name of Sire | Name of Dam | Bitch | Dog | Total | IC% 5 Gen from ISAA | IC% 5 Gen from Dogs Global | Mean kinship | Kennel/Breeder |
